## SmartDrive MX2+

Pushing a manual wheelchair can put stress on the upper body and lead to serious issues in the future. SmartDrive gives you freedom to do more. It moves with you and it's so lightweight, you don't even know it's there. You can spin in place, be in a wheelie, or hop off curbs. Empower your active lifestyle.

SmartDrive offers a range of controls to deliver a seamless power assist experience, providing an opportunity for 80% fewer pushes. SmartDrive was created with manual wheelchair users in mind.

*Starting at \$6,626*

## Empulse R90

The sleek, simple, and compact design allows the R90 to sit under your chair. The V-Lock attachment system secures the R90 to most folding and rigid wheelchairs.

The simple Control Box enables easy push-button use and can be ergonomically positioned for easy access. When power assist is not needed, simply push a button to raise the wheel up for zero rolling resistance.

*Starting at \$5,840*

## Empulse R20

The Empulse R20 is the only foldable power-assist device on the market. It's easy to transport, even when still attached to the wheelchair.

The R20's folding ability and light weight allows smooth transport while attached or separate from the wheelchair. It's easy to handle and store for all situations in every day life, including travel activities.

*Starting at \$2,402*

# Power Assist

Simply mobile

## SMOOV one

The rear-mounted power assist for your wheelchair. The SMOOV one is an innovative electric drive that you can easily dock on to and off your wheelchair whenever you need some extra power. This modern and sporty power unit significantly increases the driver's mobility.

Thanks to its light-weight and high-quality construction, the SMOOV one can be relied on for daily use, helping you power up steep hills, through carpet, and over grass.

*Starting at \$5,600*

## E-Motion Wheels

*Starting at \$5,996*

The idea behind the e-motion is simple: You can add the e-motion drive wheels to almost any wheelchair using two discrete adapters.

While moving, sensors built into the push rims measure your drive movement and provide you with the desired power. This allows you to move, steer and brake your wheelchair with very little effort. With a weight of only 17 lbs. per drive wheel, the e-motion is one of the lightest active add-on drives available.

## E-Fix

Turn your manual wheelchair into a compact electric wheelchair with the e-fix add-on drive. The drive can be individually programmed and can therefore be adapted perfectly to your personal needs. The electric add-on drive is the simple way to increase your freedom of movement.

The e-fix also allows you to cover greater distances and handle slopes effortlessly.

The components of the lightweight and compact add-on drive can be quickly removed from the wheelchair without the need for tools.

*Starting at \$6,500*
